It presents various strategies to faster reading that seem to be generally accepted best practices. Towards the end these strategies go outside of reading itself (being wiser in choosing what to read, time management). The information could have been conveyed more compact, and with less copy paste phrases (makes the reader disengage). Lastly it could have done without promoting the shady practice of homeopathy, which makes me question the author's legitimacy a bit.I can not recommend the Kindle edition.Various exercises do NOT work because words aren't italicized/underlined, or because the formatting is off. Sometimes words are unnecessarily split by a hyphen in the middle of the line. The book also doesn't acknowledge that certain techniques don't work on touch screens. All in all it feels like little care went into it.0 von 0 Kunden fanden die folgende Rezension hilfreich. Bin begeistert.Von Daniel DeichfuIch habe bereits andere Bcher zum gleichen Thema gelesen und muss sagen, dass mir dieses Buch bis jetzt am Meisten gebracht hat. Es ist sehr praxisorientiert. Nicht alle angebotenen Techniken haben fr mich funktioniert, aber das ist auch nicht die Idee des Buches. Es geht genau darum alles mal auszuprobieren und dann das weiterzubetreiben was individuell am besten passt.Und fr den Preis kann man nicht viel falsch machen.
