can hold churches back and explaining how to move forward and reach the young and future generations. People who I shared the book said they found it eye-opening, in the sense that it makes long-term church-goers realize that excessively traditional churches often are having no effect on the world outside their doors. I believe that, for presenting the facts and the solutions, this book is second only to "How to Start a New Service : Your Church Can Reach New People by Charles Arn, Leith Anderson" (note Leith on both books). Two great books.0 von 0 Kunden fanden die folgende Rezension hilfreich. Equal to Purpose Driven Church and Rediscovering Church.Von Ein Kundef you are familiar with the works of Rick Warren and Bill Hybels (author's of the aforementioned), you will love this book. Leith Anderson has taken a mid-size church and has turned it into a powerful force for Christianity. He knows how to do it. This book tells us all what to prepare for. A must if you are entering the ministry.0 von 0 Kunden fanden die folgende Rezension hilfreich. balanced research on the future changes of the churchVon Landon MeadowThis is a well balance approach to needed changes in the church for this postmodern world. It is full of information and thought provoking insight. It gives hope, in that what works in one place may not work in another, but also provides ample warning as well.

The reality is that they must change to meet the challenges of the present and upcoming generation, and they must do so quickly. But the problem is that many lay leaders and pastors don't know how to guide their churches into the kind of changes that will make their churches relevant and effective.Within church leadership circles, Leith Anderson is a nationally recognized expert on how churches can and must change not only to survive but to thrive in the next century. A Church for the 21st Century deals directly with how to change and what to change. Anderson's purpose is to help established churches renew themselves and becoming effective vehicles of ministry and outreach.Change can come to churches by gently and positively helping them diagnose their true condition and, secondarily, by pointing the way to a prescription. But Anderson gives no simplistic formulas. Every church situation is different and the changes needed are as diverse as each congregation. Good church leaders, like good physicians, are careful to determine the correct diagnosis as well as prescription.
