He has spend some time in the US and is therefore aware about the cultural differences between the two countries. With this in mind he tells what the life in Japan is like (in the 19th century). He covers all different Kind of aspects, such as living, Family, musik, studies, festivities, etc. It is extremely interesting to read, but even more so, if you have

been in the Japan of today. I really wish, that anyone of my homecountry would have bothered to write such a description about the life here in the 19th century.
