NauseatingVon cdunigan@hotmail.comAn anthology of abortion stories, told from the perspective of women who somehow simultaneously profess Christianity and spit in God's eye. All you have to do to see the facetiousness of the entire premise of this book is examine a few key scriptures:"Let the little children come unto me, and do not hinder them." Gee, I guess this means we're to dipatch them post-haste to the afterlife so they can be with Jesus that much sooner. As I recall, Jesus also said that you'd be better off with a millstone around your neck and tossed into the sea than letting God catch you harming a child. How do they reconcile God's (and Christ's) admonition not to harm children with the idea that God (and Christ) smile beatifically on while mothers have their children pureed?"Even as you do to the least of these, my brothers and sisters, so you do to me." What's the premise here? That since Jesus was willing to be crucified to reconcile all humanity to God, He won't mind being dismembered to keep your boyfriend from leaving you? Christianity teaches that we are to love God more than our families and indeed more than our own lives. This ghastly tome teaches that we're to love our plans more than we love our children, and that God thinks this is peachy. Then of course there's the "love your neighbor as yourself" admonition. Are these women claiming that killing somebody so that you can pursue your plans unemcumbered is love? Evidently so. The apostle Paul cautioned us not to lead our brother to sin -- Ah, but these are our SISTERS we're leading to sin, so it's okay.0 von 0 Kunden fanden die folgende Rezension hilfreich. Get realVon Ein KundeTo all those Bible-beating naysayers out there, I say "get real." It's really easy to talk about sin and murder when you're not the one who is pregnant. As an atheist, G-d doesn't factor into the equation for me, but I know that I am in a well-educated and economically successful minority. However, if I was statistically unlucky, I'd have an abortion simply because I'm not ready or willing to become a parent right now. The fact that religious women are even talking about abortion (other than to condemn it and its practitioners) is, I think, a step in the right direction. Fundies, get real. Abortion is a right, and you cannot take it away from us, no matter how loudly you thump your Bible.0 von 0 Kunden fanden die folgende Rezension hilfreich. What a wonderful book.Von Ein KundeThis book is amazing. Anne Eggebroten, whoever she may be, is genius! This book is what every woman who, young or old, white or black, has struggled with the concept of abortion needs! The poignant stories of each woman's experience stay with the reader long after the book is closed. Any man or woman should read this book. It offers a glimpse into the many struggles women go through in the abortion process. Definitely worth a read for those whose religious beliefs clash with their liberal views, or those simply interested in the personal accounts behind a national issue. Buy It! Right Now! You will not regret it and it will be money well spent.

KurzbeschreibungLibrary Journal said, "After a foreword and introduction that place abortion in comparative contexts, 13 Christian women (both Roman Catholic and Protestant) write about their decision to abort; seven additional chapters provide further testimonies, e.g., memories of seeing a pregnant 15-year-old in a coffin, stories of church-sanctioned rape, and the editor's testimony to the importance of her being able to choose to birth an unplanned pregnancy. A concluding chapter addresses the issue of biblical support for choice. Related issues of violence toward women receive moving but restrained attention. An important presentation of facts and arguments that have often been silenced; essential for all libraries."KurzbeschreibungLibrary Journal said, "After a foreword and introduction that place abortion in comparative contexts, 13 Christian women (both Roman Catholic and Protestant) write about their decision to abort; seven additional chapters provide further testimonies, e.g., memories of seeing a pregnant 15-year-old in a coffin, stories of church-sanctioned rape, and the editor's testimony to the importance of her being able to choose to birth an unplanned pregnancy.
