Von Bill Warner : An Abridged Koran (The Islamic Trilogy Book 4) (English Edition) before purchasing it in order to gage whether or not it would be worth my time, and all praised An Abridged Koran (The Islamic Trilogy Book 4) (English Edition):

Any politician how deals with Islamic matters should be required to study the Koran first - this is definitely a recommended read.0 von 0 Kunden fanden die folgende Rezension hilfreich. The verses of Koran in historical contextVon Peter FischerGreat introduction to the

Koran. The author went into great effort in reestablishing the historical order of the suras. In any "normal" edition the suras are ordered in length, thus the text can not be understood. By placing the suras in their correct order and historical context, it becomes clear what the Koran really is: a description of the forceful conversion of the Arabian peninsula by a warrior priest called Mohammed, who relentlessly extinguished any other religion other than Islam within the reach of his army. To do build up his army he used the spoils of war and the dhimmi tax- the heavy taxation of the non believers who had to pay half of their income. After understanding the Koran in it's historical context there can not be a shadow of doubt about it's true meaning: submission by putting the living fear of Allah in every person. For every even just moderately gifted intellect there can only be one conclusion: Islam is not religion of peace, but the religion of war and fear. As a democrat and liberal citizen of a free country I found this a very difficult read, taking into account how Islam spreads in the western countries. On this background the Koran is one of the most misunderstood books in history. There is more Jew-hatred and hatred on Christians in the Koran than in Hitler's "Mein Kampf". Actually more than a tiering 60% of the Koran consists of it. It's really like Germany in the 30's: nobody bothered to read the book. Highly disturbing!

Kurzbeschreibung During Mohammeds life, Muslims understood the Koran and debated about it. The Koran had a context, the life of Mohammed. The verses can only be understood in the light of his situation at the time. Mohammed is the key to understanding Koran. When his life is integrated into the document, the context is restored, and it becomes an epic story that ends with the triumph of Islam over all Arabia. Approximately half of the Koran is repetition. For instance, the story of Moses is told 39 times. This Koran has been abridged by eliminating the repetitive verses. Now you can read the Koran and understand it. The Islamic Trilogy Koran, Sira, Hadith Islam is a political system, a culture and a religion based upon the Koran, Sira (life of Mohammed) and Hadith (the Traditions). The Islamic Trilogy series integrates the three primary texts to reveal the entire Islamic political doctrine of the treatment of non-Muslims. The Trilogy is authoritative and fact-based. All content can be confirmed by the use of reference numbers in the primary source documents. The knowledge is integrated all of the primary sources are used to give the complete picture of Islams political doctrine. He has been a university professor, businessman, and applied physicist. He was a Member of the Technical Staff in solid-state physics at the Sarnoff Princeton Laboratories in the area of integrated circuit structures. During the energy crisis of the 80's he founded and ran a company that specialized in energy efficient homes. For eight years he was a professor at Tennessee State University in the Engineering School. Dr. Warner has had a life-long interest in religion and its effects on history. He has studied the source texts of the major religions for decades. Even before the destruction of the World Trade Center he had predicted the war between Islam and America. The day after 9/11 he decided to make the source texts of Islam available for the average person. Dr. Warner's training in scientific theory and mathematics shaped how he analyzed Islamic doctrine. The first step was realizing that the Islamic texts had been made deliberately difficult to read and comprehend. A program, the Trilogy Project (see below), was created to strip away the confusion in the texts. It became clear that Islam is not constructed on the same civilizational principles as the rest of the world. Simple statistical methods revealed that dualism and submission were the foundational principles of Islamic doctrine.
