Von Edward E. Gordon : **Enhancing Learning in Training and Adult Education** before purchasing it in order to gage whether or not it would be worth my time, and all praised Enhancing Learning in Training and Adult Education:

KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. This book is perfect for anyone who teaches adults!Von Ein KundeI read this book for work, and it was wonderful! It is

well written, easy to read, and very interesting. My company builds CBT's. I found a lot of information in the book that will help us to build better CBT's. Morgan and his colleagues are up to date on all of the latest learning theories. I highly recommend this book.

Kurzbeschreibung This book picks up where the well-received Futurework (1994) left off. It builds a strong case for workplace trainers treating their work as research. The nine chapters are designed to prepare readers to become workplace consultants. The authors present their workplace training program of research as well as a mastery learning model. By presenting ideas from instructional psychology, cognitive science, mastery learning, and performance based assessments, and then relating these findings to the workplace, the authors offer a new way to look at learning in the workplace. Considerable focus is given to the need to enhance diversity within workplace settings. Suggested readings are included with each chapter.
