KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. Inspiring And EducationalVon James GallenExtraordinary People is a collection of 21 brief, 6-10 page biographies of people

who have achieved extraordinary success through the exercise of some trait. In addition to the biography each section contains a brief summary of What you should know about ends with real life lessons drawn from the example of the featured person. The point of each chapter is virtue or talent that enabled the subject to achieve high success. We are treated to case studies of creators of businesses, those who triumphed over adversity, built alliances, team players, the audacious, courageous, the communicators and those who put integrity and being nice to others at the center of their lives. The people come from all walks of life. There are activists (Myanmars Aung San Suu Kyi), artists, (Ray Charles and Jim Henson), athletes (Jackie Joyner-Kersey), business execs (Toby Cosgrove and Martha Harper), military figures (Little Turtle and Douglas MacArthur), scientists (Stephen Hawking) and statesmen (Gouverneur Morris and John Kennedy). Author Scott Smith has put together a quick, light read that inspires and educates. Readers will reflect on the accomplishments of its subjects and ponder how they can imitate them to our own benefit. I did receive a copy of this for review
