The best book on 'why' to home educate that I've read.Von LeeAnn BalbironaNo public or private school teacher can equal the 1:1 ratio of a parent-child relationship. Guterson dispels myths about homeschooling being only for eccentrics and religious zealots and addresses the usual questions of 'does your child have any friends?' and 'is your child REALLY

being educated?', as well as issues of legality, the role of public schools in America and how the state school system can be an asset to parents rather than a harassing neighbor. I would definitely recommend this book to the parent that would like to homeschool, but thinks it would either be too hard, too time-consuming or too weird. Plus, he's a pretty good story-teller and this book is filled with amusing anecdotes. (It's only after I bought it that I realized he was the same author who wrote the locally famous "Snow Falling on Cedars.") 0 von 0 Kunden fanden die folgende Rezension hilfreich. Great Book, whether you homeschool your children or not! Von S. Madan I found this book to be full of usefull and helpful information! I think that Mr. Guterson did a wonderful job of informing parents of today's schools and how important family is in making education work. I would recommend this book to any parent wether they plan on homeschooling their children or not. Since the auther is both a public school teacher and a homeschooler he can see clearly both sides of the homeschooling "debate", (for lack of a better word.) He makes it abundantly apparent that all parents everywhere need to make a decision to be a major part of their children's educational experience whether that means teaching them in the home or choosing to send them to public school. No matter what you decide is best for your child(ren) this is a book that I would suggest any parent read! 0 von 0 Kunden fanden die folgende Rezension hilfreich. Outstanding must-have compared to other homeschool books Von Ein Kunde Forget HOW to homeschool -- what really matters is this beautifully articulated argument for WHY to homeschool. Institutional school is inflicted on generations of Americans in large part because we assume it's necessary to our cultural identity. Guterson makes a cogent, complete, and compelling case that children learn best when their own families take charge, and that the cold war between public schools and everyone else must finally yield to a more integrated, cooperative focus on each child's learning (wherever it may take place). Like Guterson, I am both a homeschooling parent and a public school professional -- this is the book I would have written someday if he hadn't already said it all so well. END

Kurzbeschreibung An honest, perceptive discussion of children, education, and our common life as a nation by the bestselling author of *Snow Falling on Cedars*. A high school English teacher, Guterson and his wife educate their own children at home. A literate primer for anyone who wants to know more about alternatives to the schools (Kirkus s). Index.
