Disappointing for me Von Boris I so much wanted to like this book. You wouldn't believe it today, but oh so many years ago, before all this Spidey-, X-, and Avengers-mania the FF actually were the flagship title of Marvel. The World's Greatest Comic Magazine. I devoured their adventures as a kid. Later the book grew dull and duller, and then Civil War gave me the last punch. So what I saw from the previews of Robinson's new arc looked promising and I decided to give it a try. And the elements are all there: the Thing trying to renew his relationship with Alicia, the portrayals of the four characters in a very nostalgic way; even Herbie the Robot has his cameo. The FF are put on trial for every damage they have caused since their formation. So the Thing went through a brick wall going to their first meeting ever. This was 60s show-off just to demonstrate how strong he was. But here it is taken serious. For me this approach does not work. You have to accept that comic books were different half a century ago and you can take that history with sympathy and irony, but not literally. Or you can ignore it and just do something completely different. I mean the story is not a bad thing by all means and there is some mystery building. The art of Kirk is flawless. But what was missing for me was the soul of it all. It just did not work for me. Those are not my Fantastic Four. Neither are they a Fantastic Four for the 21st century because the baggage is all there. I will not purchase the next volume.
