It is new and improved; hence the change in nomenclature. The manual its self is part of a complete system. The system is described as best as possible in the beginning of the book. We get an over view of war its self and the purpose it serves. Eventually we get to the nuts and

bolts tactics of The Infantry Rifle Platoon and Squad. Being in armed reconnaissance (Tet-68) it was not as grueling as being in a rifle platoon. It was not as necessary to hone the skills on a daily bases but everyone is a soldier first. Ever wonder how a hand full of professionals can out maneuver, think and act against a bigger or better equipped force? It is mostly training and drills combined with the flexibility to carry out the commanders intent and take advantage of targets of opportunity. To do this you have to know the commanders intent and recognize targets of opportunity. The field manual is best used for its intended purpose. However as with many other manuals one can build character and apply not the specific tactics but their purpose to other disciplines. In a mechanized war it is easy to forget that somethings need to be taken and held. I have always had a respect for those that can. Even though I never acquired a military attitude I found it intriguing trying to out maneuver those that follow the book. I would have paid for my time at the National Training Center (Mojave) and similar locations.

Kurzbeschreibung Painstakingly formatted for optimum performance on eReaders, this 600 page field manual provides a doctrinal framework on how Infantry rifle platoons and squads fight. It also addresses rifle platoon and squad non-combat operations across the spectrum of conflict. Content discussions include principles, tactics, techniques, procedures, terms, and symbols that apply to small unit operations in the current operational environment (COE). FM 3-21.8 supersedes FM 7-8, Infantry Rifle Platoon and Squad, dated 22 April 1992 (with change 1, dated 1 March 2001). It is not intended to be a stand-alone publication. To fully understand operations of the rifle platoon and squad, leaders must have an understanding of FM 3-21.10, The Infantry Rifle Company, and FM 3-21.20 (FM 7-20), The Infantry Battalion. The primary audiences for this manual are Infantry rifle platoon leaders, platoon sergeants, and squad and fire team leaders. Secondary audiences include, instructors in U.S. Army Training and Doctrine Command (TRADOC) schools, writers of Infantry training literature, other Infantry leaders and staff officers, and Reserve Officer Training Candidate (ROTC) and military academy instructors. Anyone attempting to gain an understanding of military concepts and operations will benefit from reading this book or using the interactive table of contents to jump to the topics that interest you. Infantry leaders must understand this manual before they can train their companies using ARTEP 7-8 MTP, and ARTEP 7-8 Drill. They should use this manual as a set along with the publications listed in the references.
