Von Bill Sunderland : Fly Fishing the Sierra Nevada: Revised and Expanded Edition (English Edition) before purchasing it in order to gage whether or not it would be worth my time, and all praised Fly Fishing the Sierra Nevada:

Revised and Expanded Edition (English Edition):

KurzbeschreibungThe Sierra Nevada stretches 430 miles down the spine of California, from Lake Almanor in the north to the Mojave Desert in the south. It is home to a wide variety of trout, from the big Mackinaws that inhabit Lake Tahoe to the achingly beautiful goldens of the high country. This updated and revised edition of "Fly Fishing the Sierra Nevada" details where to go, how to get there, and what techniques and equipment to use on the numerous creeks, rivers and lakes of the Sierra.

Frankly, what Sunderland has done is gone the extra mile. ...The result is a heck of a book -- the only new outdoors book this year to make my top-rated, must-read shelf." (September 1, 1999)
