A Dream Every Bowie Fan Dreams At Least OnceVon TweeggyWritten in a fluent and lively way, David Colworth told his story how he met his teenage hero David Bowie and experienced, what I - and I guess loads of young Bowie fans back in the early 70s - dreamed of. He went through teenage hell at school in a small South England town by listening to the "wrong" music. Finding friends and growing stronger by listening over and over to the songs that Bowie wrote

short before turning into Ziggy Stardust. Watching Bowie play live to a small audience, meeting the star in the making and then losing him as he becomes famous. Ups and downs of a real fan. I hope the book sells well and will be made a bit more GLAM in the next edition. Thank you for sharing your story, boy in the bright blue jeans. P.S: Please add some info about the author. What happened to Brer Rabbit?

Kurzbeschreibung It's England in the early 1970s. A weary nation engulfed by strikes, power cuts and endless economic crisis. The Beatles are gone, the Swinging 60s are a distant memory and the music scene is moribund. But help is on its way - far out in space, Ziggy Stardust is coming to save Planet Earth ! Read how a teenage fan follows Bowie from obscurity to international stardom, with a fascinating account of how he came face to face with Bowie just weeks before his breakthrough, at a crucial point in his career. Meet David Bowie before he became famous : warm, down-to-earth and humourous, a world away from the glacial, unattainable superstar he was soon to become. This is the true story of the boy in the bright blue jeans who jumped up on the stage to join Bowie and his band, a poignant tale of how one young fan achieved his dream - and played Ziggy's guitar !
