**Von Aaron Einstein : Islam. Sharia. No, thanks. (English Edition)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Islam. Sharia. No, thanks. (English Edition):

KundenrezensionenHilfreichste Kundenrezensionen1 von 1 Kunden fanden die folgende Rezension hilfreich.  
Interesting views, food for thoughtVon The Sinner ReaderWe do hear a lot from the arab world nowadays, and sadly it is not often good news. The more that populations move around the world, the more cultures mix. Not all cultures are equal, some treat each other and others differently. This short ebook highlights some of the problems within the

teachings of Islam, what that could mean to "the western world" and the small changes we can make to lessen the negative impact of parts of this culture.0 von 1 Kunden fanden die folgende Rezension hilfreich. Made for simple mindsVon Pro LiberalPointless and a waste of time to spend more words on this "booklet". Made for biased people who love to read out of context.

KurzbeschreibungIslam. Sharia. No, thanks.Islam is a topic of much debate, even in countries where the Muslims make up only a small minority of the population.This short e-book, or essay, takes a look at the risks that Islamization of the west poses to the western civilizations.This e-book contains quotes from the qur'an and many hadiths, and looks at why many 'westerners' are worried about the 'creeping sharia' being imposed in their lands.KurzbeschreibungIslam.
