Von Kieron Gillen, Dan Abnett, Andy Lanning : Journey Into Mystery/New Mutants: Exiled before purchasing it in order to gage whether or not it would be worth my time, and all praised Journey Into Mystery/New Mutants: Exiled:

Masterpiece of MythologyVon BorisAfter having stayed away for a long time from the Asgard franchise because of the way Straczynski had been driven away I gave the Journey into Mystery run of Kieron Gillen a try having read so

much praise about it. The first collection of this run made me hooked; the two following volumes were rather disappointing. Meanwhile I have read Gillen's Thor run in the omnibus collection too; and now it was "Exiled". I have to say this volume is the culmination of Gillen's work on the characters until now. The book consists of the "Exiled" one-shot, JIM #637-638 and New Mutants #42-43, all co-written by Gillen and Abnett/Lanning with art by the genial Carmine Di Giandomenico. This must have been an editorial piece of work, because these five books that read so smoothly appeared within only two months of real-time. It is a real cross-over being parts of one story published in different magazines. Without spoiling too much: Those whose name may not be spoken aloud play a central role in this story, Loki and Mephisto top each other scheming, and Thor and a lot of other Asgardians get both their heroic and their comical moments. The characterization of the New Mutants is so interesting that I might pick up some collection of their own title too in the near future. If you are interested in a modern (or post-modern) interpretation of Nordic myths with fun reading and a pinch of irony you are highly invited to read this book. Oh, did I mention that Carmine Di Giandomenico is a genius?
