When I started reading it I thought it was just another one of these meditation books, but somehow this one touched me really deeply and it's ideas nurture me on a daily basis.The author took me deeper and deeper into the inner space that I truly am. I felt guided and carried along. For me the meditations are very practical. During day to day situations when I feel irritated I try to think of

what she expresses in the book, like to grow roots of original trust and to ask for true love and happiness. I highly recommend this book to anyone who is on their own journey.
