about the effort of pushing the bike. Good lecture!

**Kurzbeschreibung**In 2008, Mark Beaumont smashed the world record for cycling around the world, by an astonishing 81 days. His race against the clock took him through the toughest terrain and the most demanding of conditions. In 2009, Mark set out on his second ultra-endurance challenge. And this one would involve some very big mountains. **The Man Who Cycled the Americas** tells the story of a 15,000 mile expedition that once again broke the barriers of human achievement. To pedal the longest mountain range on the planet, solo and unsupported, presented its own unique difficulties. But no man had ever previously summited the continents' two highest peaks, Mt McKinley in Alaska and Aconcagua in Argentina, in the same climbing season, let alone cycling between them. Oh, and Mark had never even been up Ben Nevis before. Full of his trademark charm, warmth and fascination with seeing the world at the pace of a bicycle, Mark Beaumont's second book is a testament to his love of adventure, his joy of taking on tough mental and physical feats, and offers a thrilling trip through the diverse cultures of the Americas. **Pressestimmen**"Interesting, engaging and truly knacker-ing just reading about it" (London Cyclist)"One of the highlights of Beaumont's writing is the way he captures the subtle nuances of life... a brilliant read that really captured my imagination" (Mary Bor [curiousbookfans.co.uk](http://curiousbookfans.co.uk)) **Werbetext**The story of a second epic and record-breaking endurance adventure by the author of the bestselling and award-winning *The Man Who Cycled the World*.
