Maya Astrology and YouVon tijaxI have been writing my own charts with the Mayan Cholq'ij-calendar (Tzolk'in). I like Addams' book "The Mayan Calendar Users Guide" a lot. It is a guide for everyone: for people who are familiar with the Mayan cosmology and their knowledge of time, which is unique in the world - but it is just as well a book for people who want to take their first steps into the Mayan culture and their calendars.His delineations of the 20 day signs are very comprehensive: the quality of the day (with cosmic meaning and mythological background), what is best to do on a specific day, the character of a person born under a special day sign (his talents and challenges), body parts ruled by a day sign, power places, totems and a lot more.He explains the Tree of Life/Mayan Cross as a person's horoscope, the different kinds of charts that can be built up and which one is best to be used in which case. But also charts for a couple, a group of people or even for a person in combination with the date of an event he explains very vividly - and these are aspects which are quite new for the readers! What I appreciate especially: for some of his examples, he shows the Mayan day signs of people who are well-known by younger people, like Charlie Sheen, Britney Spears, Lady Gaga and the Beatles.Last but not least, there is until today the great question how the Mayas handled the leap years (or better: the leap-time) and how they paid regard to these corrections in a horoscope. Addams found new aspects in this issue: there is a change of the 4 "Year Bearers," the rulers of years in the solar calendar 'Ab (Haab), every 52 years. The Year Bearers count a lot in Guatemalan Mayan horoscopes in characterizing a person, but also tell the quality of a year for all mankind. So, it seems, there are corrections to be done among people working with Mayan horoscopes. Very soon, in 2013, there will be such a change of Year Bearers, and Addams gives us an outlook of the qualities for the years starting with 2013.Shay Addam's book is a true treasure trove, full of research, full of the old knowledge of the Mayan sages, but as well of his own experiences in making Mayan horoscopes - and everything written in a generallyunderstandable and fresh way!
