KurzbeschreibungStreet Photography in the second biggest township of South AfricaA collaboration between a team of people from diverse backgrounds and nationalities, The Mdantsane Way offers the reader an interesting

photographic journey through the second biggest township Mdantsane in South Africa. Mdantsane is situated close to the city of East London in the Province of the Eastern Cape and has a very special history. It was established in 1962 under the framework of the Apartheid Regime and its purpose was to provide living space for cheap African labor coming from East London and the rural areas surrounding East London. The first inhabitants who were living in Mdantsane were residents who had been removed by force from an area in East London called the East Bank. The East Bank was a multiracial area at the time. In the following years further forced resettlements took place and Mdantsane grew rapidly into a big township developing its own character and life-style. The Mdantsane Way guides the reader on a pilgrimage to discover the street culture, food, fashion, people, music, homes, taverns, humour and history. The reader is offered an insight into Urban African life and is introduced to many individuals, artists, groups, businesses and associations. The author Isabella Fischer, living in Africa since many years, has collected the material for this book during a period of four years. In collaboration and with the technical assistance of Mrs. Pelisa Welemu, a Mdantsane resident and the founder of the only old age home in the township, the first photographic documentary about this so far un-discovered and fascinating township has been created. The Mdantsane Way is the first book of its kind, a coffee table book with striking photographic material, that has been carefully selected from an archive of over 10.000 images taken over time and powerful stories told in a simple but captivating way. With 238 pages and hundreds of color photographs- many full page and covering a wide variety of themes - this digital version offers the reader an insight into one of the most colorful and pulsating places in South Africa. Most of all The Mdantsane Way is a way of life. The look and lay-out of The Mdantsane Way, designed by Onehitale Innocent Ugue, graphic designer and software developer and a Nigerian, residing since many years in South Africa, makes the book as colorful as Mdantsane itself. Sit back and enjoy the vibrancy, stories, laughter and the hope of South Africa !
