perfect fodder for a thriller, I didn't feel this book lived up to its possibilities. First off, the heroine gets hired as THE corporate lawyer by a huge biotech firm. She lies on her resume about her background and experience. And NO ONE bothers to check her background and references? Yeah right. If you can get past that, the book then becomes a pretty good (if somewhat by-the-formula) read. Until I got to the end and found the ending totally unsatisfying. Without giving it away, I still had a lot of questions as to what happened to whom at the end. Ms. Christofferson did not tie up her loose ends. Hate that! 0 von 0 Kunden fanden die folgende Rezension hilfreich. A new and prophetic voice in suspense fiction Von Ein Kunde A new and prophetic voice in suspense fiction. Christofferson leads us through a sinister, covert world of biotechnology in which industrial espionage in the pursuit of the latest life-saving drugs, and human organ replacement by theft and murder are standard. This harrowing novel, filled with the author's expertise in the biotech field, makes it clear that no one will ever be safe from the ungoverned scientific experiments that await us.

Kurzbeschreibung Jennifer has to prove that Dr. Fielding funded his biotech firm by dealing in illegally obtained human organs - including her husband's -- for transplant into the bodies of people who could pay almost any price to extend their lives. But that's not the worst of Sherwood Fielding's transgressions against nature, as Jennifer soon finds out. Working on the cutting edge of a lucrative field like genetics is risky - and Jennifer finds herself in a maelstrom of murder, industrial espionage, deceit and personal betrayal. Embroiled in a plot of unimaginable medical perversion, Jennifer must fight for the truth about the science being done at the firm. Especially as it leads her to the truth of how and why her husband died. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied. Pressestimmen "Christofferson is a writer you will become addicted to!" --Ann Rule, author of "Bitter Harvest" "April Christofferson ranks up there with Tami Hoag for writing can't-put-it-down suspense." --Michael Palmer Kurzbeschreibung Jennifer has to prove that Dr. Fielding funded his biotech firm by dealing in illegally obtained human organs - including her husband's -- for transplant into the bodies of people who could pay almost any price to extend their lives.
