Over 200 pages that come in handy if you have a dream you can't make sense of, or see something that looks/feels like an omen, and is one of the best I've seen of its kind. The initial 4 chapters are excellent and quite illuminating. Ms. Linn has a clear, easy to read, concise writing style, with a nice dose of wisdom. Chapter # 1: "How Signs Work". Why signs reflect your beliefs and the focus in your life, where they come from (the collective unconscious/culture, society and religion), signs from the past and the future, and more. Chapter 2: "How Signs Appear in Your Life": Through other people/conversations/random thoughts/emotions/printed words, and much more. She gives little "true stories" to illustrate each point. Chapter # 3: "Calling for a Sign". From "traditional sign systems" (the I Ching, etc.) to "vision quests", the many ways to seek guidance...though I like the way she ends the chapter: "There are never any wrong choices; for every choice in life allows you to grow and expand as a human being". Chapter # 4: "How to Interpret Signs". From using your intuition, to using a dictionary, 10 methods to decipher what you believe to be a "sign". This is an excellent book with many uses...as an artist, I use it as a reference guide to imagery, and it's also given me ideas for future projects...for which I'm grateful to Ms. Linn.

This book clarifies and teaches in countless examples how very ordinary things bring powerful messages to us everyday. At first I felt overwhelmed by my heightened awareness, then things began to settle into a natural, integrated process. The sign dictionary at the back of the book is vital to interpreting simple signs that keep reappearing. Reading signs is like learning a foreign language and her book is so easy to read I keep reading it over and over like a reference book. The personal stories she shares makes the book entertaining and instructional. GREAT BOOK - GREAT GIFT.

This book will explain what everyday signs in your life mean. It is sometimes hard to find a specific sign that you might see - but she does have explain what that symbol (instead of seeing a funeral on a cold rainy morning - she will explain what seeing a funeral means) There are a lot more signs than just a funeral. The lil bird outside your window every morning could be a sign too. Check this book out

Smoke can also indicate a lack of clarity. With this powerful, easy-to-use guide, Denise Linn helps us to reconnect with the magic of our inner selves to make the right decisions and choices in our lives. From the Trade Paperback edition. From Library Journal Linn (Sacred Space: Clearing and Enhancing the Energy of Your Home, Ballantine, 1995), a healer and practitioner of interior alignment, discusses how signs and portents appear in our lives and how we can interpret them. Her present work assures the reader that the universe is always putting out signs that, if read properly, will furnish understanding and assistance from other realms. Linn also discusses how we can call for signs, as well as the role of mistakes and coincidences in our lives. The bulk of her book is a dictionary of meaning of signs, from major life changes such as miscarriages to small objects such as cameras or garbage. The meanings are frequently posed in the form of questions. While Linn's essays and introduction are intriguing to someone beginning to explore alternative consciousness or spirituality, the dictionary analyses are frequently incomplete and necessarily impersonal.
